Contents Volume 17

Vol. 17 No. 1

Variability in the reproductive cycle of *Stichopus mollis* (Echinodermata: Holothuroidea)
Mary A. Sewell and Patricia R. Berquist (Auckland) 1
Amplification of tropharium rDNA in the telotrophic ovariole of the bug, *Dysdercus intermedius*
Frank Dittmann, Günther Steinbrück and Axel Münz (Tübingen)
Antiserum directed against reassembled basal body components
R.H. Gavin and D.A. Wilmot (Brooklyn, NY) 9
Reproductive periodicity of three species of chitons at a site in New South Wales, Australia (Mollusca: Polyplacophora)
David R. Currie (Armidale, NSW) 19
Stimulation of *Spisula* sperm motility by 5-hydroxytryptamine analogs
Arjun L. Kadem (New York NY) and S.S. Koide (Woods Hole, MA) 33
The ultrastructure of the spermatozoa of *Petalomera lateralis* (Gray) (Crustacea, Brachyura, Dromiacea) and its phylogenetic significance
Barrie G.M. Jamieson (Brisbane) 39
Electron microscopic observations on the male genital tract and sperm development in *Peripatus sedgwicki* (Peripatidae, Onychophora)
Volker Storch (Heidelberg) and Hilke Ruhberg (Hamburg) 47
Necessity of juvenile hormone for choriogenesis in the moth, *Heliothis virescens* (Nuctuidae)
S.B. Ramaswamy, G.N, Mbata and N.E. Cohen (Mississippi State, MS) 57
Embryogenesis and the effects of temperature on embryonic development, juvenile growth rates, and the onset of oviposition in the fresh-water pulmonate gastropod *Physella cubensis*
Donald L. Thomas and James B. McClintock (Birmingham, AL) 65
Bacillus thuringiensis strains affect population growth of the free-living nematode Turbatrix aceti
Jan Meadows (Auburn, AL), S.S. Gill (Riverside, CA) and Leon W. Bone (Auburn, AL) 73
A morphological study of wound response and telson regeneration in postlarval *Limulus polyphemus* (L.)
Anthony S. Clare (Beaufort, NC), George Lumb (Durham, NC), Patricia A. Clare and John D. Costlow (Beaufort, NC)
Book Review: The Invertebrates: A New Synthesis
R.S.K. Barnes, P. Calow, and P.J.W. Olive (with a chapter by D.W. Golding) 89

Vol. 17 No. 2

Giant nerve fibers and rapid escapte reflexes in newly hatched aquatic oligochaetes, *Lumbriculus variegatus* (Family Lambriculidae
C.D. Drews (Ames) and R.O. Brinkhurst (Sydney B.C.) 91
Origin of germinal cells and the reproductive cycle of the asteroid *Asteria rubens* L. (Echinodermata)
C. Bouland and M. Jangoux (Bruxelles) 97
Overall effects of the temperature-senstivie *ecd-1* mutation on fertility in *Drosophila melanogaster*
Georges Pétavy (Gif-sur-Yvette) 103
Population and seasonal differences in egg quality of *Arbacia lixula* (Echinodermata: Echinoidea)
Sophie B. George (Villefranche-sur-Mer) 111
Presence of bombyxin-like molecules in the brain of *Eisenia fetida (Oligochaeta Lumbricidae)*
Ferdinand Sauber, Michel Reuland, Edouard Ries (Luxembourg),
François Holder and Maurice Charlet (Strasbourg) 123
A Symposium on "The Developmental Biology of the Ascidian", Ananushi, Japan, August 1988. Organized by Takaharu Numakunai and Charles Lambert
Japan-U.S. Cooperative Symposium Developmental Biology of Ascidian
Charles C. Lambert (Fullerton, CA) 127
Review: Tunichromes, vanadium, and vacuolated blood cells in tunicates
Kenneth Kustin (Waltham), William E. Robinson (Boston) and Mitchell J. Smith (New York) 129
X-ray microanalytical studies on cryofixed blood cells of the ascidian *Phallusia mammillata*. III. Quantative analyses of non-vanadium-asscumulating blood cells
S. Scippa, M. de Vincentiis (Naples) and K. Zierold (Dortmund) 141
Morphological aspects of ascidian fertilization: acrosome reaction, apical processes and gamte fusion *Ciona intestinalis*
Makoto Fukumoto (Nagoya) 147
Retinal isomers in the cerebral ganglion of the ascidian, *Halocynthia roretzi*
Shogo Kajiwara (Aomori), Satoshi Tamotsu, Yikitomo Morita (Hamamatsu) and Takaharu Numakunai (Aomori) 155
Allogeneic rejection induced by cut surface contact in the compound ascidian, *Botrylloides simondensis*
Euichi Hirose, Yaskunori Saito and Hiroshi Watanabe (Shizuoka) 159
Early oogenesis in the ascidian *Ciona savignyi*
Yasuo M. Sugino, Akio Tominaga, Yoichiro Takashima and Masaru Ishikawa (Ehime) 165

Early oogenesis in the ascidian *Ciona savignyi*
Yasuo M. Sugino, Akio Tominaga, Yoichiro Takashima and Masaru Ishikawa (Ehime) 165

Vol. 17 No. 3

Spermiogenesis and sperm ultrastructure in the freshwater mussel *Diplodon chilensis chilensis* (Mollusca : Bivalvia)
Santiago Peredo, Orlando Garrido and Esperanza Parada (Chile) 171
A comparison of reproduction by the brooding spatangoid echinoids *Abatus shackletoni* and *A. nimrodi* in McMurdo Sound, Antarctica
John S. Pearse (Santa Cruz, CA) and James B. McClintock (Birmingham, AL) 181
The influence of fiet on ovarian maturation, mating, and pheromone production in the housefly, *Musca domestica*
T.S. Adams and D.R. Nelson (Fargo, ND) 193
Histochemistry and ultrastructure of the capsule gland duct of the prosobranch gastropod *Pomacea paludosa*
Gertrude W. Hinsch and Patricia E. Vermeire (Tampa, FL) 203
Histochemistry and ultrastructure of the albumen gland duct of the prosobranch gastropod *Pomacea paludosa*
Gertrude W. Hinsch and Patricia E. Vermeire (Tampa, FL) 213
Isolation and characterization of vitellin from the ovary of *Penaeus monodon*
Emilia T. Quinitio (Hakodate and Iloilo), Akihiko Hara (Hokkaido), Kohei Yamauchi and Akira Fuji (Hakodate) 221
Larval development of a tropical zoanthid (*Protopalythoa* sp)
R.C. Babcock (Townsville) and J.S. Ryland (Swansea) 229
Ovarian development and vitellogenesis in the sawfly, *Athalia rosae ruficornis* Jakovlev (Hymenoptera, Tenthredinidae)
Masatsugu Hatakeyama, Masami Sawa and Kugao Oishi (Kobe) 237
A scanning electron microscope study of ectodermal differentiations in the caudal mantle epithelium of embryos and juveniles of *Loligo vulgaris*, *Loligo forbesi* and *Sepia officinalis*
W.P. Paulij and J.M. Denucé (Nijmegen) 247
Indexes to Vol. 17 257
